- October 23 — 7:00PM Active Living Committee Meeting
- October 24 — 7:00AM Utilities Commission Meeting

Annual Notice to All Customers – Minnesota Cold Weather Rule

The Minnesota Cold Weather Rule is designed to protect people who may have trouble paying their utility bills in winter. The Minnesota Cold Weather Rule applies from October 15 to April 15. The rule, established by the Minnesota Public Utilities Commission, means that Mountain Lake Municipal Utilities cannot disconnect a customer's residential electric service during the winter IF THE CUSTOMER MEETS THE FOLLOWING REQUIREMENTS:

1. Utility disconnection would affect the customer's primary heat source;
2. The customer has declared an inability to pay on forms provided by the utility. (Note: Customers receiving any form of public assistance including energy assistance are deemed to have qualified for inability to pay status);
3. The household income of the customer is less than 50 percent of the state median income level as documented by the customer to the utility; and
4. The customer enters into and makes reasonably timed payments under a payment agreement that considers the financial resources of the household.

If you have trouble paying your utility bills, local agencies may be able to provide payment assistance. The MN Department of Human Services recommends contacting Des Moines Valley Health and Human Services, 1-507-831-1891 or United Community Action Partnership 1-800-992-1710.

If you know you are going to have trouble paying your utility bills, please visit city hall or contact Mountain Lake Municipal Utilities at 507-427-2999 Ext. 6 before a bill is due to complete a partial payment request form. For more information visit: <https://mn.gov/puc/consumers/help/shut-off-protection/>

Winterization Tips & Ways to Trim Your Heating Bill

Colder weather and winter are on its way. Here are some winterization tips to winterize your home and lower your heating bill:

Change your furnace filters. If the filters are dirty, your furnace has to work harder. In most homes, filters should be changed monthly in the heating season. You should also have your furnace serviced periodically to make sure it is working properly.

Get a programmable thermostat. The newest thermostats can learn your family's habits and set themselves to keep the house cooler when no one is there and warmer when the home is occupied. You can also purchase a more basic programmable thermostat. Prices vary considerably, depending on how sophisticated you want your thermostat to be.

Replace weatherstripping around doors. If you can see light around the edges of your doors, you need new weatherstripping. Weatherstripping can cost you five or six dollars, and it can save you hundreds of dollars in electrical bills.

Caulk around windows. Warm air can escape and cold air can enter your house if the area around your windows has cracks. Caulking needs to be replaced periodically, and you should check every fall for holes that need to be patched, as well as holes anywhere outside your house.

Burn Site Hours

Located east of the wastewater ponds at the corner of 360th Street and 575th Avenue

September 1st to Season Close:

Monday 3 – 6 PM Wednesday 3 – 6 PM

Saturday 9 AM – Noon; 1 – 4 PM
